

Additional Personal Information - September 2022

Student Name: _____

Please return this form to Danella Goodman, Office Manager, by Friday 10 June 2022.

Our Data Capture Form has a section where you can detail your child's medical conditions. It would be useful to know if your child has any issue(s) we need to take into account in planning for the start of term

Where a student has a medical condition, which needs medication to be taken during school hours, we will supply you with a medical form on which you can set out clear instructions to allow us to support your child.

Was your child on the Special Educational Needs register in primary school, especially during their Primary 7 Year?

Yes No

If 'yes', please provide further details about their SENs (i.e. stage and category). To ensure your child experiences a smooth transition, we recommend you provide the College with recent IEPs or other reports such as Educational Psychology reports.

Loss and bereavement are always a difficult thing for a child to cope with in school. This can be doubly difficult when a child has just changed school and is not yet comfortable with the adults s/he is meeting for the first time. If your child has suffered any significant loss, bereavement or change of circumstances, please enter details below. If there is something you feel we should know which is confidential, please do not hesitate to write about it on a separate sheet and include the sheet in a sealed envelope when you return this form.

If there is anything further you would like the College to know, please provide details below.
